CURLING NOTES

The curling season opened on Thursday November 23 with Len Cooley defeating Bill Todd in a game which was called on the eight end on account of snow blowing on the ice. The following evening W.

Gallagher took a 16-5 trim from F. Morrell and G. Aitken scored a 10-5 victory over C. W. Rideout.

Saturday afternoon saw G. Aitken take possession of the local cup, defeating W. Gallagher 12-4. In the evening J. Gingles defeated W.S. Lee 10-7.

Monday, November 29 brought J. Peyton's rink into action against Bill Todd who suffered his second loss by a 9-6 score. In the second feature W. Gallagher won over Len Cooley 13-12 in a wide open game.

On Tuesday night G. Aitken successfully defended tee cup against C. W. Rideout in a closely fought game. The final score was 7-5.

A number of the members have been complaining of sore muscles, the only remedy we recommend is to do a little sweeping(?)

The feature match of the week will be between the cupboard G. Aitken and the Abenhart rink headed by the Honorable K. B. Langley.

A Wheat Surprise

Alberta has won the world's wheat championship at the International Winter Fair in Chicago for so many years that the people of this province almost came to think of this high award belonging to Alberta perpetually. If any other province or state were to wrest the championship from Alberta it was generally believed that the honor would fall to either Saskatchewan, Manitoba or Montana. But this year a comparative newcomer to the competition, British Columbia, sprang a surprise. The world's champion wheat grower is now Gordon Gibson, son of a prominent farmer near Ladner, B.C.

British Columbia has never been known as a province which produced wheat to any great extent. In fact imports from the prairies, Australia and the United States northwest are necessary to meet the domestic and milling requirements of Canada's most westerly province. Apparently, however, there are among British Columbian farmers a few who are exceptionally capable. And now Ladner, in the Fraser Valley delta, has taken the wheat crown from the Peace River country in Alberta. To add irony to the situation, Gordon Gibson won with a sample of Reward wheat, a variety which has been brought to a high state of development in Alberta and more particularly in the Peace River country. Herman Trelle gained his greatest victories with that variety of hard spring wheat.

Mr. N. Stewart returned from Calgary on Thursday.

Mr. J. Conley spent a few days in Calgary returning this week.

The Ladies' Card Club

The Ladies' Card Club met at the home of Mrs. Todd last week. Honors were shared by Mrs. Youell and Mrs. Wilson. The Card Club will meet next week at the home of Mrs. Wilson.

Mr. Wm Davis who lives about twelve miles south of town left for his home about five o'clock but the blizzard was so bad he could not find his way, so he decided to sit in his sleigh until morning. Fortunately he had a covered sleigh and plenty of robes.

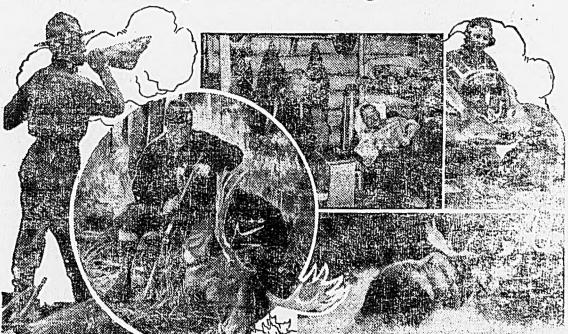

Mr. R. McKinnon is visiting at Brostons.

Seen around town—a lot of snowbanks.

Plan Splendid Hunting Season

Prospects for big-game hunting are unusually bright in Canada this fall. Reports covering the thousands of square miles of wilderness accessible by Canadian Pacific Railway show a plentitude of game and excellent conditions for hunting. Outfitters and guides across the country also report record seasons. They expect parties both from Canada and the United States, than they have had for years.

Wild sections of Canada, like the rugged Rockies, the Yukon and Arctic regions, and the Mackenzie, are practically in the back yard of civilization have a wide variety of big game in addition to many types of game birds and smaller mammals.

An indication of the increased interest in hunting this year has been given by the number of applications coming to the general tourist office in Windsor Station, Montreal, for copies of the two hunting guides, "The Guide for Hunting" and "Camping Waters and Game Hounds."

Resources For Western Benefit

The petroleum industry in Western Canada has been making great forward strides in the past few months and these recent developments indicate that the time may not be far distant when American sources of supply of crude will be shut off altogether and the entire consumption requirements of at least the prairie provinces will be furnished from Western Canadian wells.

Such consummation of the aspirations of producers in what is at present the largest Western Canadian crude oil field, Turner Valley in Alberta, is not only highly desirable, but undoubtedly can be achieved in the very near future, provided producers, consumers, refining organizations, both privately and co-operatively owned, and the transportation companies think any differences there may be between all or any of them and work together as a unit for the achievement of this objective.

There is no longer any doubt as to the capacity of the Turner Valley field to supply all Western Canadian requirements. As a source of supply of crude oil of excellent quality for possibly many years to come Turner Valley is a proven field and is not only able to supply all consumer demand in the prairie provinces but probably contains reserves sufficient to supply other markets as well. The oil is there. The market is here. All that is required is to make it economically feasible for the two to connect, and that means as cheap transportation as can be provided without loss to the carriers.

A Move Is Made

Some steps in this direction have already been taken by a reduction in railway rates on trainload basis between the Turner Valley field and Regina, Saskatchewan, where a number of refineries are located. As a result Imperial Oil Ltd. have announced their intention of expanding their already large plant in Regina, providing for a substantially increased number of employees. Smaller independent and co-operative refineries in the same city have also announced they are prepared to expand materially provided they are permitted to share in reduced transportation charges by a reduction in carlot rates comparable with the lowered trainload rates.

The owners of the large privately-operated refining plant have announced that they are not opposing the application of the smaller concerns for reduced freight rates on carlot basis, but railway officials appearing before the Board of Railway Commissioners contested representations for such reduction. Arguments on both sides were presented and the matter was left in the hands of the Railway Board for a decision.

Pipeline Cheaper

From the viewpoint of both producer and consumer, however, chief interest must have centred in the undisputed announcement by transportation company representatives that trainload rates were reduced to meet threats of the proposed construction of a pipeline to carry the crude oil from the field near Calgary to Regina refineries, and the further admission that oil could be conveyed by this method more cheaply than by rail even under the reduced trainload rate available in practice only to the larger concern.

By agreement between the producing companies, production at the wells has been pro-rated at 35 per cent. of capacity flow, in itself proof that the field requires a much larger market than economic restrictions at present permit.

What Might Be Done

This dual situation at the source of supply and at the smaller refineries, coupled with the information revealed at the hearing before the Board of Railway Commissioners, predicates the feasibility of some of the producers and the independent and co-operative refineries joining forces to finance a pipeline, unless some reasonable freight rate concession is granted the latter.

The statement that crude can be carried more cheaply through a pipeline than by rail under lowered trainload rate seems to give a cue to the course that might be adopted by the smaller companies, if sufficient volume could be assured to make such a project economically sound.

It is to be hoped, however, that some allowance will be made to place the smaller refineries on a more competitive basis and that such concessions can be made not only applicable to consignments to Regina but to all points in the prairie provinces where refineries are located. Such policy would ensure that all crude oil traffic available would be enjoyed by the railways and would undoubtedly result in material expansion in volume in the future, a result which should inure to the benefit of the transportation companies in the long run as well as to producers, the small refineries and the consumers.

Economic Balance Needed

From Saskatchewan alone it is estimated that not less than \$10,000 a day has been finding its way into the treasuries of producers on the other side of the international boundary and American railways. Anything that can be done to divert this to the advantage of Western Canadian oil producers and the Canadian railways should also benefit the taxpayers and consumers of this country.

It has often been said, and with truth, that western economic life is not well balanced. Any steps which can be taken to develop western resources for western consumption, as well as other markets for any surplus, is a step in the direction of providing for a better economic balance.

As a matter of fact, few prominent citizens are actually misquoted in print. All the newspapers do is to correct the grammar.

Although often called a copper, the American penny is really bronze. There are more than 30,000 lakes in Florida.

'Plane For King George

Was Especially Constructed And Will Carry Four Passengers. Emulating his royal ancestors, with their specially built carriages for their pleasure or for affairs of state, King George VI, an aviation enthusiast like his brother, the Duke of Windsor, now has a monoplane constructed especially for him.

Although the King, who was once a group captain in the British Royal Air Force, has already flown in the new monoplane, details of its construction have just been revealed by the Society of British Aircraft Constructors, Ltd. The airplane is a low-wing craft built largely of wood and is powered by two Dassault Cheetah IX, radial air-cooled engines of 350 horsepower.

In general, the royal airplane is similar to the standard British Air-speed Envoy transport monoplane, series 3. However, it has many luxurious accommodations not found on the standard Envoy, including armchair seats for four passengers. Each of the seats is fitted with its own table, which has tumbling holders and ash trays.

Room has been made on the royal airplane for a steward, and the refreshment cabinet in his charge is located in the rear of the cabin. There is also space for the fitting of an occasional fifth passenger seat by the fuselage door.

A leather screen separates the cockpit from the cabin. The Air Council, which placed the order for the royal airplane, decided that radio equipment and a place for a radio operator should be located just behind the pilot, and because of this it was necessary to shift the forward bulkhead about nine inches.

The cabin is sound proof. Thick velvet curtains cover its doorway and deaden the propeller noise. Fuel fumes from the engines cannot enter the interior.

The plane has a retractive undercarriage which reduces air resistance to a minimum and allows the airplane to take off easily at 100 miles an hour. The maximum speed level is 210 miles an hour, and the range is 650 miles in still air.

List Of Best Sellers

Statistics Kept At McGill Shows Devotional Book Leads

Statistics concerning "best-sellers" on this continent are kept on file in the McGill University library school in Montreal. A list of 65 "best-sellers," each of which sold 500,000 copies or more between 1875 and 1933, is headed by the well-known "In His Steps," written in 1899 by Charles Monroe Sheldon.

Gene Stratton Porter had a tremendous vogue, "Freckles" selling 2,000,000 copies and "Girl of the Limberlost," 1,700,000. "The Sheik," by E. H. Hull had a sale of 1,946,000. Lew Wallace's "Ben Hur" sold 1,950,000 copies.

Mark Twain's "Tom Sawyer" had a sale of 1,500,000 copies, a number equalled by Gene Stratton Porter's "Laddies". "The Call of the Wild," by Jack London, reached a sale of 1,454,000 copies. "The Story of the Bible" by Jesse Lyman Hurlbut sold 1,321,000 copies.

German Reparations

United Kingdom Has Received \$610,000,000 In Payments

Lieut.-Col. John Colville, financial secretary to the treasury, questioned in the House of Commons, said the United Kingdom received \$122,000,000 (\$10,100,000 at today's rate of exchange) in reparations payments last year.

The aggregate of sums the United Kingdom received on account of war debts, excluding debts from the Dominions and colonies, was \$71,000,000. The aggregate of the amount the United Kingdom paid the United States in respect to the war debt, including token payments, was \$2,025,000,000.

Cutsouts on automobiles aid in taking back pressure off the cylinders when descending grades and hills.

THE STORY OF FLIN FLON

One Line Started Career

Canadian Born Opera Star Got Chance During War

The Great War gave Margaret Bannerman, Canadian-born opera star of "Three Waltzes" her chance on the stage. The beautiful blonde who has just had her American debut at the Boston opera house recounted the story of her success as she rested between acts of the musical extravaganza. Miss Bannerman is a native of Toronto.

Her parents were living in a years in Folkstone, England, and the refreshment cabinet in his charge is located in the rear of the cabin. There is also space for the fitting of an occasional fifth passenger seat by the fuselage door.

A leather screen separates the cockpit from the cabin. The Air

Council, which placed the order for the royal airplane, decided that radio equipment and a place for a radio operator should be located just behind the pilot, and because of this it was necessary to shift the forward bulkhead about nine inches.

The cabin is sound proof. Thick velvet curtains cover its doorway and deaden the propeller noise. Fuel fumes from the engines cannot enter the interior.

The plane has a retractive undercarriage which reduces air resistance to a minimum and allows the airplane to take off easily at 100 miles an hour. The maximum speed level is 210 miles an hour, and the range is 650 miles in still air.

"Come here, Canada! Try reading this line."

In spite of all her nervousness, she managed it well. She said: "Here comes Tina!" in a voice that was loud enough to be heard across the footlights.

Holding covered herself with glory

far, they gave her another line,

which was to be sung, and Margaret Bannerman has been singing and speaking lines on English and Dominion stages ever since.

ALICE STEVENS' RECIPES

USE LEAVENING AGENTS ACCORDING TO RULES

Have you ever started to make a cake and when the work was well done, found that the baking powder tin was empty? If you understand a few of the underlying principles of leavening agents you will have very little trouble.

If you are using a cream of tartar solution, it will be a trip to your neighbor's to borrow some.

Baking powder is made up of 50% acid and 25% alkali. The acid used must be a good one, the resulting baking powder is called a tartaric baking powder. The alkali used is baking soda. The remainder is a mass of starch. This starch absorbs any excess moisture and prevents the chemical action starting in the can.

If your recipe calls for two teaspoons baking powder, it is to

use one and a half teaspoons

one and a half teaspoon soda.

The general rule given for the use of baking powder is to use two teaspoons baking powder, one cup of flour, one egg, and one teaspoon salt.

To this add one and a half teaspoon of cream of tartar.

One teaspoon flour is required for two cups of sour milk. It is also recommended that an additional teaspoon of baking powder be added for each cup of flour.

If one egg is used, the rule is to decrease the amount of baking powder by one half teaspoon for each egg.

The egg-white holds some air when beaten up, that is not the same amount of leavening agent required.

While these rules apply to all flour mixtures, there are slight variations when other ingredients are added. When Grated cheese is added, the amount of baking powder is reduced.

When ever dried fruit is added, the amount of baking powder is increased.

When ever raw apples are to some of your recipes? Apple sauce is frequently added but it makes a nice change sometimes to add small pieces raw apples. This muffin recipe and I think you will find it very successful.

APPLE MUFFINS

1½ cups bran
1 cup flour
2 teaspoons baking powder
½ cup brown sugar
1 cup sliced apples
1 tablespoon butter
1 cup sweet milk
1 egg
Pinch salt

Mix and sift the flour, baking powder, salt and sugar. Add the bran and mix all the dry ingredients. Peel and core the apples. Cut into small cubes and add to the dry ingredients. Beat the egg and mix with the milk. Add to the dry ingredients and add the melted butter last of all. Put in greased muffin pans and bake in a moderate oven 25 to 30 minutes.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The Wings Of Desperation

The Case Of Brazil And The New Regime

Events in Brazil itself will have to clarify the situation. Meanwhile, whether the new regime is to be regarded merely as another dictatorship of a familiar pattern or as an entering wedge for Fascism or in the Western world, it seems clear that it owes its existence in large measure to the economic adversities which have beset Brazil.

Despite its great natural wealth, that country has suffered heavily from depression. Its greatest crop, coffee, has been a drug on the market. Its farmers have experienced bitterly hard times. Some millions of people, lacking any earthly possessions, have been sunk in misery. The burden of its foreign indebtedness has been heavy and its external bonds have been frequently in default.

Once more we have an illustration of the fact that dictatorship, whether old-style or new-style, is never the free choice of a contented people. It comes into power on the wings of desperation.

Beauty Is Revealed

When Dust Is Removed From Statuary In Westminster Abbey

Visitors to Westminster Abbey, recently opened to the public following removal of the Coronation setting have been amazed by the transformation in the chapel of St. Edmund and St. Thomas, on the south side of the ambulatory.

Gone is the atmosphere of antiquity, no trace of grime and dust. Monuments, tombs and effigies placed in the chapel generations ago have a striking appearance of newness and walls have been restored to their original color. "Just an ordinary cleaning," attendants assure inquirers.

For instance, the elaborate canopy of the tomb of Sir Bernard Brocas, executed on Tower Hill in 1400 for plotting against Henry IV, now is snow white. Before it was a dull slate color, streaked with black.

To-day's Best Story

A scribe hurled Bert Saunders of Pittsburgh through a \$60 plate glass window—at least that was his story to a magistrate who freed him of a charge of breaking the window. "I was just walking along," Saunders said, "and all of a sudden I had to stop. Just as I did, you know, I stepped on a piece of fruit and the stone was so strong I was thrown through the window."

The Natchez Indians named the month of February "Chestnut Moon."

There are more than 1,500 foreign language newspapers in the United States.

HIS BACK ACHED FOR 4 YEARS

Kruschen Put Him Right

For four years, this man's back ached almost continuously. Now, at last, he starts the day fresh as a daisy, and his back aches no more. Results? "I had continuous backache for four years. I looked on the black side of everything. Now, I write with extreme gratitude for what Kruschen has done for me. The freshness with which I start my day's work is perfectly marvelous. After seven days of Kruschen, I felt better and could get up immediately, and my early morning dose of Kruschen is my salvation."

The kidneys are the filters of the human machine, and they become sluggish properties until they way into the blood-stream and produce troublesome symptoms—backache, rheumatism, and depression. The kidney salts in Kruschen quickly carry you back to healthy normal action. As an immediate result, you experience relief from those old dragging pains. As you persevere, you lose your pains altogether.

Will Keep It Trimmed

Sir Hubert Wilkins Not Sacrificing His Distinguished Beard

There are many sacrifices imposed upon explorers by ruthless Arctic elements, but separation from his distinguished beard will not be one of them, Sir Hubert Wilkins admitted at Edmonton.

Although famous Arctic adventurers often have been bearded men, formation of ice in the facial foliage usually has persuaded them to discard the trimmings while in sub-zero regions.

While scorning the suggestion of a deicing mixture, the famous gentleman-adventurer admitted he was carrying a pair of clippers to the Arctic and the beard would be trimmed short during his far northern sojourn.

Rochester Short Of Nurses

Government Barring Of Canadians Criticized By Hospital Official

A U.S. government rule barring Canadian nurses from taking up temporary residence in the United States brought criticism from Clare Dennis, superintendent of nurses at Strong Memorial hospital, Rochester, N.Y. Charging a dearth of nurses here and in other border cities, Miss Dennis said hospitals may be forced to turn away patients because of the rule.

There are more than 1,500 foreign language newspapers in the United States.

Prepare for '38 Drive on Hoppers

Despite the heavy mortality
rate among grasshoppers this
due to natural causes, "heavy
artillery" is already being
lined up in event of a further
outbreak next season; with
that in mind, federal officials
have issued bulletins describing
various types of home
made bait spreaders, utilizing
various odds and ends found
on majority of farms.

The mechanical spreaders
are said to have worked well,
especially in the territory
surrounding Swift Current
Sask., where lands are dry
and the "hoppers" have di-
gested almost everything in
sight except barbed wire fencing.

The Government bulletin
points out there are three
basic parts to the antihopper
spreader — the "hopper" and
the automatic feed device; the
spreader table, and the "pow-
er plant."

Various methods of con-
struction and necessary parts
utilizing such articles as oil
barrels, lumber, iron rods, and
sheet metal — and how to put
them together — are all out-
lined in official bulletins. De-
tailed information may be
obtained from any of the pro-
vincial departments of agri-
culture or Dominion experi-
mental stations in the West.

One type of spreader — the
autotrailer type — has as its
most important unit, the
"hind-quarters" of an automo-
bile chassis, complete with
propeller shaft.

Power for operating the
various types of poison spread-
ers can be obtained from
pulleys attached to the rear
wheel of a wagon or truck or
tractors can be used.

Woman Took 14 Coyotes In Two Weeks

COMIX, Nov. 26. (Special)
Looking so slender and trim in
her buckskins and furs that she
resembled more a Zane Grey her-
oine than a mother of a six year
old son, Mrs. Madge Ratcliffe
modestly admitted she had trap-
ped fourteen coyotes during the
past two weeks, "but," she hastily
added "that is not very many."

The Ratcliffes are wintering
at the lower camp of the N ranch
on the Milk River. It is a picture-
esque spot in summer, but 'n
winter the isolation is complete.
Their only mode of travel will be
on horseback. Mr. Ratcliffe's work
necessitates much absence from
home, so his wife and small son
carry on very capably in his ab-
sence.

Bad Blizzard at Chinook

On Thursday of last week
this district was visited with
a bad blizzard. In the after-
noon the weather was quite
mild and at six o'clock there
was a little shower of rain,
followed by a strong north-
west wind with snow. The
blizzard raged all night con-
tinuing next day, although not
so severe.

Mr. Weber, Local Manager of
Alberta Government Telephones
of Hanna was in Chinook on
Wednesday working on long dis-
tance lines.
